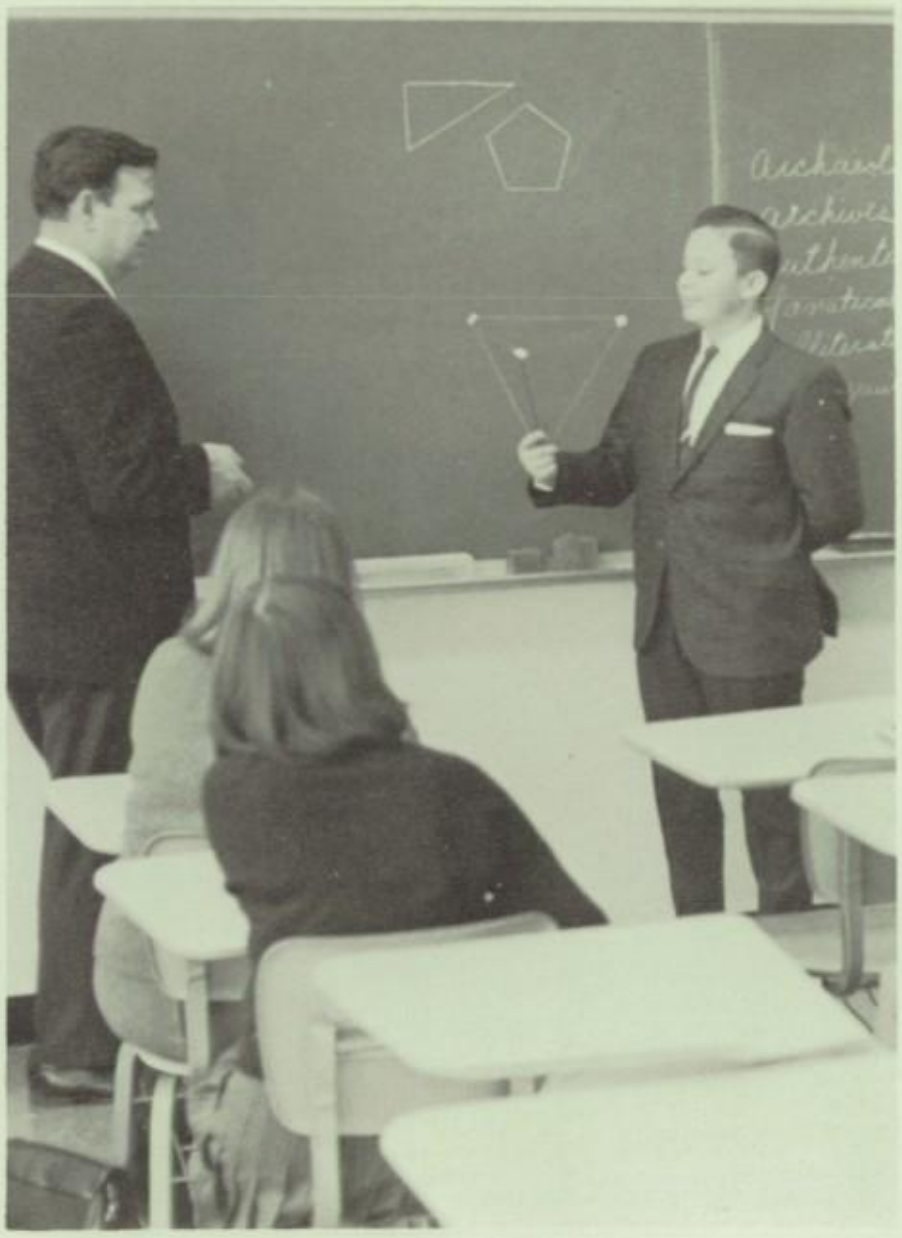
Math, Science Courses Vary

The 1966-67 school year finds several mathematics and science courses available to students of CHS. Among these classes are: General Science, Algebra, Geometry, Biology, and Chemistry. The following pictures provide typical examples of math and science class activities.



"Now, listen, Mr. Delmore!!"

"Ish. . ."

German Offered Students

The English department, including all the high school students, has the largest enrollment of all subjects. As an added feature of the languages, first and second year courses in German are offered to all sophomores, juniors, and seniors.

CHS Students Keep Fit

Physical education classes not only provide a time for participants to "let off steam," but they play a vital role in the health and fitness of the students. Twice weekly, each Junior and Senior High School student takes part in a phy-ed class.

"Go out with my girl, will ya!!!!"

Students Train For Jobs

Playing a large part in the training of students with practical skills, the business, shop, and home economics departments are important members of the CHS curriculum. The business students pictured here have put their knowledge to work as employees of the down-town businessmen.
